# ILLUSTRATION OF SUTCLIFFE TROLLEY BRICK DRYER

AT CRAMLINGTON.

*The most effective & economical Brick Dryer on the Market.*

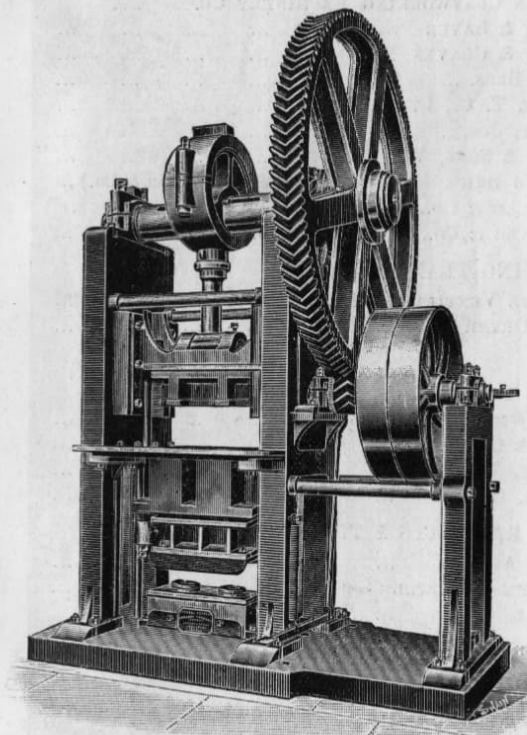

NO SCATTERED STEAM PIPES ! NO LEAKY JOINTS ! NO HANDLING FROM CUTTING TABLE TO KILN !

Write for particulars— **SUTCLIFFE VENTILATING & DRYING CO.,**

Telephone No. 3920.  
Telegraphic Address—"Ventilabro, Manchester."

**Cathedral Corner, Fennel St., Manchester.**

## CRAVEN'S STEAM POWER BRICK AND TILE PRESS.

The above is an illustration of our latest Improved Press ; it has been designed for pressing extra large bricks, tiles, quarries, etc., and will take in any of these goods up to 20 in. square.

The eccentric, which is of the best crucible cast steel, is brought to a standstill at each revolution, and the machine cannot be started without depression of the foot lever, which is placed in a convenient position for the attendant.

The machine is very powerfully geared and mounted on a solid cast-iron bedplate.

**BRADLEY & CRAVEN, Ltd.,**  
**Westgate Common Foundry, Wakefield.**

## PUBLISHER'S NOTE.

---

THIS Directory, the first of its kind published, is mainly compiled from the list of subscribers to THE BRITISH CLAYWORKER, and the Publisher desires to thank those who have supplied him with information concerning their manufactures.

The book will not be published annually, but the Publisher will be pleased to receive corrections or additions from time to time; also any suggestions that may tend to make the work increasingly valuable to Clayworkers and those who specify their goods.

MANCHESTER.

## BROWN'S PATENT KILN.

The latest and most perfect continuous kiln for the burning of Facing bricks, Terra-Cotta, Pottery, Tiles, Quarries, Common bricks, Lime and Cement.

The advantages of this kiln are :—

- (1) Adaptability to any output whether small or large.
- (2) Complete economy, equal to that of the Hoffmann Kiln.
- (3) Perfection and evenness of burning.
- (4) Minimum of damage by overheating.
- (5) Great speed of burning with consequent economy of initial outlay and economy of burners' wages.
- (6) Simplicity and ease of manipulation with complete control for all forms of work.
- (7) Suitability to all classes of goods even of the most delicate nature.
- (8) Easy attainment of the very highest temperature.
- (9) Easy arrest of progress, so avoiding Sunday labour.

Kilns of this design may be seen in work by persons interested, and trial burnings of goods will be made if desired.

It is the only Continuous kiln which will burn facing bricks and delicate goods as perfectly as a down-draught kiln and with 25% of the coal.

Kilns are now at work in England and Belgium for an aggregate output of 1½ million bricks weekly.

For all particulars apply to :—

Telephone 440 AVENUE.

# THE "NEW PERFECT" KILN

UP AND DOWN  
DRAUGHT

AND  
"UP-TO-  
DATE."

IT WILL EVENLY & THOROUGHLY BURN

7,000 to 10,000 BRICKS

WITH ONE TON OF DUST COAL

IT GIVES

Perfect control of the fire,  
Perfect combustion,  
Perfect economy, and  
Perfect results.

THERE IS

No smoke or smell,  
No soft or waste bricks,  
and there are  
No repairs.

IT IS

Not complicated, but it is  
Easy to operate, and  
Very easy to obtain.

## TARRANT'S PATENT

### CONTINUOUS DOWN-DRAUGHT CHAMBER KILN

with Patent Drying Flues is the best yet invented for the use of the Hot-air System.—The hot air being delivered by small flues all across the Kiln near the bottom to prevent crushing.

It will burn from 100,000 to 160,000 bricks per week (according to size) from one face of fire.

For economy in the consumption of Coal, the burning of Facing Bricks and all kinds of Clay goods of a uniform colour, it cannot be surpassed.

All flues are so arranged as not to affect the strength of kiln. Simple but strong in lines of construction.

For full particulars apply to the patentee :—

THE

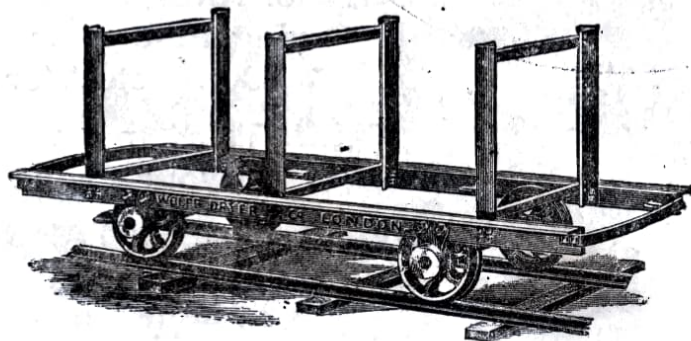

# Iron Clad Dryer

Is a development of 29 years' practice and experience; it is the most widely known and successful Dryer in this or any other country. The

500 in use in America, and the 125 in Great Britain and Ireland, drying over 13,000,000 bricks per day; in other words: evaporating more than 20,000,000 lbs. or 2,000,000 gallons of water every day.

**THE IRON-CLAD DRYER** is a copy of Nature's own method, which is the only true principle. The air is warmed as it passes over a series of steam radiators which are heated by the Exhaust Steam of the engine, and are placed below the materials to be dried. This warm air naturally rises, absorbs the moisture from the ware, and passes out of the draft stack without the aid of complicated machinery, hence we have no breakdowns and require no experienced engineers.

**DRYING TENDER CLAYS** is our great specialty, and success is ensured by the special adaptability of our Tempering Room in conjunction with the Drying Room, and by this method, bricks made of the most tender clays can be dried without cracking. Any of our Dryers can be inspected, and one can always be found within easy access of any brickyard. Write for catalogues to—

## WOLFF DRYER CO.,

89 & 91, Sumner St., Southwark, S.E.

We are the only Dryer firm in England that manufactures their own cars, etc., which are made at our London Works.
